project outline
CBD Projects were engaged as design and construct project managers to upgrade Truman Hoyle's offices, to meet with their Award winning corporate image. The works were all to be completed within the incentive offered by the landlord and within a very tight time frame. CBD projects carried out these works by engaging a design company and acting as project managers. The project was completed in 11 weeks and within the required budget. The result is a striking new environment that has been enthusiastically received by all Truman Hoyle's staff and clients.
